'WHAT YOU DO MAKES A DIFFERENCE, and you have to decide what kind of a difference you want to make'

Dr Jane Goodall, world-renowned environmentalist particularly famous for her work amongst the chimpanzees of Tanzania.

Dr Jane Goodall exudes a quiet determination. She sat for months and months observing chimpanzees and getting them to trust her. As an avid conservationist, she spells out her four reasons for hope: the amazing human intellect; the resilience of nature; the power of young people; and the indomitable human spirit. What we each can do on a daily basis can make a difference.

Young Climate Warriors are challenged this week not to just 'stand-by' but to reduce 'vampire power' by switching off appliances left on standby. Young Climate Warriors is primarily about engaging and empowering children, but also provides a valuable opportunity for letting children's voices be heard. Please remind them to **'HIT THE RED BUTTON'** when they have completed this challenge.

Don't just 'stand-by' ... take action & then **Hit the Red Button!!**

Little glowing eyes follow you in the dark ... as you leave the room at night ... as you leave to go to school ... they just carry on glowing. Can you guess what these energy-sucking vampires are?

Hunt down all little red or green eyes - count how many you find - and then switch them off (checking with your parent/carerer first!).

Don't just 'stand-by', take action!! and **HIT THE RED BUTTON** to let us know when you have!

14th October challenge!

When you've completed this challenge ... Remember to hit the red button!

YOUNG CLIMATE WARRIORS
