'Imagination is more important than knowledge'

Albert Einstein – Theoretical Physicist

This week's Young Climate Warriors challenge encourages children to think creatively – to use their imagination to help combat climate change. Do you agree with Einstein, what do your children think?

How can we move away from our 'throwaway' culture, turn our waste into something useful or creative, and live within the limits of our finite resources? This challenge includes ideas for upcycling and reusing waste materials to make birthday cards, and presents – including something very special for Fathers' Day.

**Upcycling —
time to climb into a story**

Climb into a story – which would you choose? Desert island, jungle adventure, or mountain hideout?

Imagine you have limited resources. Help reduce your impact on climate change by upcycling.

Homemade birthday cards? Collage art? A tin full of jokes? Father's Day promises jar?

Thousands of repair cafes are opening up – is there one near you?

This week's challenge:
10th June

YOUNG CLIMATE WARRIORS

When you've completed this challenge ... Remember to hit the red button!
