

## Suggested newsletter text – Heating & Insulation

'What keeps me optimistic is that so many of us want this change to happen, and I think together we can win this'.

Elizabeth Wathuti. UN Young Champion of the Earth.

Elizabeth Wathuti witnesses the front line impact of climate change on a daily basis - 'Africa is not waiting for the crisis to come, it is impacting us right now'. Combatting climate change and reducing our carbon emissions requires everyone's help – changes need to happen at every level – individual, community, business, government – together we can win this.

Young Climate Warriors are challenged each week to be part of the solution. This week's challenge encourages families to reduce their household carbon emissions by drawing their curtains and shutting the door on draughts.

Let's crack on ... no time for 'drafts' nor 'draughts'!!

Help keep the heat in, and carbon emissions down!

Warm air leaking out of our homes lowers the temperature - so the boiler has to work harder, burning more fuel, costing more money, and creating more carbon emissions.

Help your family this week - draw all the CURTAINS at DUSK and remember to SHUT the DOOR on DRAUGHTS.

20th January challenge!

When you've completed this challenge ... Remember to hit the red button!
